Education

Vignana Bharathi Institute of Technology

Nov 2022 – May 2026

Bachelors of Technology in Computer Science and Engineering (GPA: 8.9)

Experience

coding.Studio();

Hyderabad, India

Software Development Engineer III

March 2024 - Present

- Managed the complete life-cycle of a dynamic full-stack project, from strategic planning and design to testing and ensuring high-quality, seamless user experiences.
- Collaborated with a team of developers to integrate advanced features and optimize performance, driving functionality and responsiveness across platforms.

EpsilonPi

Hyderabad, India

Junior Associate

July 2024 – Present

- Conceived and developed innovative projects leveraging Machine Learning and AI to solve complex real-world problems.
- Collaborated seamlessly with 14 team members, including 5 data scientists, 3 data analysts, and 5 Machine Learning engineers to proficiently address various technical challenges and ensure flawless project execution.

Projects

Flappy Bird AI using NEAT Algorithm

- Developed an AI agent using the NEAT (NeuroEvolution of Augmenting Topologies) algorithm to evolve neural networks and improve gameplay performance in the Flappy Bird game.
- Implemented a fitness function to reward survival and pipe-passing, driving continuous AI improvement across generations.

CO2 Emissions Forecasting using Regression

- Implemented a research paper on CO2 emissions prediction from scratch using multiple regression models, including Random Forest, Linear Regression and Support Vector Machine (SVM).
- Achieved 99.67% accuracy with Random Forest Regressor, improving model performance by 1.24% by applying advanced feature engineering, scaling, and preprocessing techniques.

Face Recognition using Haar Cascade

- Developed a face detection solution using OpenCV's Haar Cascade classifier in Python, enabling accurate identification of faces in images and videos.
- Leveraged pre-trained Haar Cascade features to build an optimized and scalable object detection system.

Biometric Attendance Monitoring System (In Progress)

- Developing a full-stack application to track and analyze biometric attendance data of students with recurring late arrivals, incorporating filters for department, academic year and date.
- Streamlining monitoring processes to enhance faculty efficiency with an intuitive interface.

Technical Skills

Programming Languages: Python, Java, C, C++, JavaScript, TypeScript, HTML/CSS, SQL

Professional Skills: Machine Learning, Artificial Intelligence, Competitive Programming

Developer Tools: VS Code, Jupyter Notebook, Git, GitHub

Technologies/Frameworks: TensorFlow, scikit-learn, Numpy, pandas, React, FireBase, LiveKit, Streamlit, openCV

Extracurricular / Certifications

Palo Alto Cybersecurity Virtual Internship AICTE, 2024

IIT Hyderabad Remarkskill: Artificial Intelligence and Machine Learning Workshop

PCAP: Programming Essentials in Python

Network Technician Career Path: Cisco Networking Academy
